

Catherine Siller

Front End Software Developer

Front end software developer currently working on an internal application at Hulu, based in React, Typescript and GraphQL. Previous to Hulu, I led the development of Pathwire and Mailgun's websites. From internal applications to public facing websites, I'm ready to expand my skills in software development at a great company working with ReactJS.

TECHNICAL SKILLS

Languages	HTML, CSS, JavaScript, React, Typescript, Angular, Vue, Node.js, GraphQL	Testing	Optimizely for CRO, Ghost Inspector Testing, Unit Testing, Karma, Mocha, Chai, Sinon
Frameworks & Libraries	Gatsby, NextJS, Contentful CMS, Wordpress CMS, LESS, SCSS	Tooling	Chrome Dev Tools, Webpack, Rollup, Gulp, Grunt, NPM, Yarn, ESLint
Engineering	Git, Object-oriented Programming, Functional Programming	Non Technical	Agile, Scrum, Kanban, Stakeholder Management, Community Management, Sprint Planning, Hosting Scrum Ceremonies

WORK EXPERIENCE

Software Developer (Contractor)

Hulu

09/2021 - Present

Achievements/Tasks

- Software development on an internal application focused on Hulu ads. Before being served to a Hulu viewer, each one of these ads goes through a sophisticated workflow involving sales and planning, targeting, trafficking, and quality control, to deliver maximum value to our advertisers while maintaining an engaging overall experience for Hulu viewers
- Daily tasks include creating React components, fixing bugs, adding/updating test coverage, attending daily standup, pointing Jira stories, executing design mocks into code (desktop only)
- Updating the GraphQL repo in order to correctly update API data that communicates with the UI repo
- Actively working with the QA team to answer questions for testing the application's components, fixing bugs reported by the QA team in order to unblock Jira tickets from completion
- Working with React, Typescript, and GraphQL on a daily basis

React Web Developer II

Mailgun by Pathwire

08/2019 - 08/2021

Achievements/Tasks

- Launched [Pathwire.com](https://pathwire.com) website built using React, GraphQL, Node.js, Gatsby, and Contentful CMS. Worked on building upon Pathwire.com, built in 4 languages (English, French, German, and Spanish). Worked with designers to achieve best results in mobile, tablet, and desktop. Maintained high lighthouse scores through every change
- Assisted with the launch of [Mailgun.com](https://mailgun.com) in September 2019, from a Wordpress website to a Contentful CMS with React and Gatsby
- Continuously built new React components and pages for Mailgun's website, while actively maintaining the site and its infrastructure and participate in the on-call rotation
- Translated design concepts to the web for all device sizes, continuously optimized for performance and conversions while executing compatibility and performance testing
- Worked closely with CRO team on executing tests in order to provide the best user experience and contribute to revenue growth
- Consistently met and worked with the SEO team in order to optimize the website through HTML elements, SEO schema, and accessibility

WORK EXPERIENCE

Software Developer II

Rackspace

10/2016 - 07/2019

Achievements/Tasks

- Development of the agnostic UI framework, [HelixUI](#), which is made of web components and consumed by Rackspace developers in order to create internal and customer-facing applications. Developed in HTML, LESS, and JavaScript to create UI components and testing manually on browsers to ensure compatibility
- Met with designers, project managers, development managers, and stakeholders on a daily basis in order to efficiently design compatible, reusable, and accessible components
- Interacted with project management to determine the scope of stories to commit to within sprints, as well as communicated the needs of stakeholders
- Documented standards of the project so that other developers are able to contribute with proper knowledge of standards to upkeep efficiency of code
- Contracted from 10/2016-04/2017 and focused on the development of an Angular UI framework, [EncoreUI](#), written with HTML, CSS, Bootstrap, and Angular for stakeholders (Rackspace developers) to utilize in order to develop in their respective projects/applications

Software Developer

Springbox

12/2015 - 05/2016

Achievements/Tasks

- Wrote optimal, well documented, and clean code for fast performance and scalable applications, mainly utilizing Wordpress
- Utilized latest technologies to produce high-performance, responsible websites from mobile to desktop
- Consulted with clients on establishing media presence through their homepages and social media
- Met daily with scrum and design team to designate tasks, while also meeting weekly with project manager to estimate tasks and to discuss future Nestlé projects with their timelines
- Project Links: [Poland Spring Bottled Water](#), [Arrowhead Bottled Water](#), [Ozarka Bottled Water](#), [Zephyrhills Bottled Water](#)

Software Development Intern

Springbox

09/2015 - 12/2015

Achievements/Tasks

- Collaborated with the design team on a daily basis to redesign the Nestlé Regional Spring Water websites redesign from .NET sites to Wordpress sites
- Maintained the Springbox websites internally with updates
- Maintained other clients' websites through PHP-based content management systems such as Wordpress and Drupal
- Worked on an internal project, a one-page Angular application, to improve efficiency to search and filter for information, used internally by Springbox

EDUCATION

M.S. Information Systems and Security

Our Lady of the Lake University

08/2013 - 12/2015

B.A. History

University of Texas at San Antonio

08/2007 - 05/2013
